

Cedar Branches Technical Rider (2018)

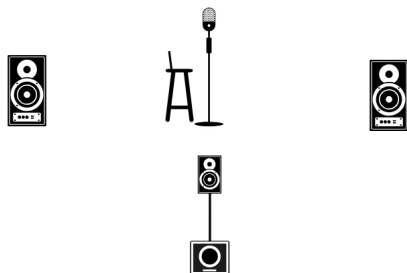

Cedar provides a wide variety of performance content, and customizes content based on the context of the venue and need. He is currently offering spoken word, live music, and stage performances. Please refer to the below technical requirements based on each show type for general criteria. Specific requirements will vary widely depending on customized show content, and will be communicated based on your event. If any specific technical requirements are unable to be fulfilled by the venue, Cedar will work to provide his own equipment and operators.

Spoken Word Performance (General Venue Requirements):

Full PA equipped with subwoofer.

Stage seating (performer).

Music stand or podium.

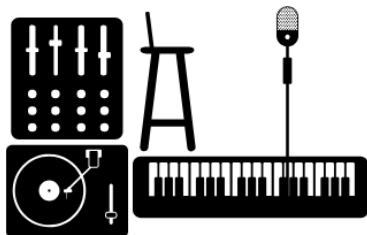

Musical Performance (General Venue Requirements):

Full PA equipped with subwoofer. (PA system must allow numerous independently controlled microphone and instrument inputs.)

Full sound table is desirable.

Basic customizable stage lighting.

Stage Musical (General Venue Requirements):

Full PA equipped with subwoofer. (PA system must allow at least two independently controlled microphones and an external input (either Bluetooth or standard audio DIN).

Stage must be large enough to sufficiently handle multiple actors and props (minimum ~10'x16').

Full customizable stage lighting is desirable including hue lighting and spotlight.
